

SRM Robocon Recruitment RAG FAQ Dataset

This document is optimized for Retrieval-Augmented Generation (RAG) systems. The content is structured into short semantic chunks with natural student-style queries to improve embedding retrieval quality and doubt-solving performance.

Exam Timing

Q: What is the exam timing?

A: The Robocon recruitment exam is conducted from 5:15 PM to 6:45 PM.

Q: Can I come late?

A: Yes, but no extra time will be provided after 6:45 PM.

Q: Can I attend tomorrow instead?

A: Yes, students can attend on either day depending on their selected domains.

Possible Student Queries: exam timing, robocon timing, late entry, test time, when is exam

Exam Venue

Q: Where is the exam happening?

A: The exam venue is UB 5th Floor.

Q: Will classrooms be assigned?

A: Students should come to the 5th floor where Robocon members will guide them.

Possible Student Queries: venue, UB 5th floor, classroom, location, where is exam

Exam Mode

Q: Is the exam online or offline?

A: The recruitment test is completely offline.

Q: Is it written or interview based?

A: The first round is written.

Q: Can I write from home?

A: No, the test is conducted physically on campus.

Possible Student Queries: offline exam, written test, online or offline, interview

Laptop Requirement

Q: Is laptop compulsory?

A: Laptop is compulsory only for SPACED Web Development and certain MCSOCD domains.

Q: Do coding students need laptop?

A: General coding domains do not require laptops unless specified.

Q: Can I bring tablet instead of laptop?

A: Laptop is preferred for software-related domains.

Possible Student Queries: laptop, coding laptop, webdev laptop, tablet, software domains

Domain Limit

Q: How many domains can I attempt?

A: Students can attempt a maximum of two domains.

Q: Can I write one domain today and another tomorrow?

A: Yes, if you stay within the two-domain limit.

Q: Can I attempt only one domain?

A: Yes, students may choose to attempt only one domain.

Possible Student Queries: domain limit, two domains, one domain, multiple exams

Coding Domain

Q: What type of coding questions are asked?

A: Questions include algorithms, logic building, aptitude, MCQs, and subjective coding questions.

Q: Which programming language can I use?

A: Any programming language may be used.

Q: What is expected from first years?

A: First years may write only logic or algorithms.

Q: What is expected from second years?

A: Second years are expected to write complete working code.

Possible Student Queries: coding, algorithms, logic, programming language, aptitude

Electronics Domain

Q: What should electronics students prepare?

A: Students should revise 11th and 12th electronics basics, aptitude, and robotics-related electronics.

Q: Will electronics have MCQs?

A: Yes, both MCQs and subjective questions may be present.

Q: Are first and second year papers same?

A: No, separate papers may be conducted.

Possible Student Queries: electronics, semiconductors, current electricity, robotics electronics

Mechanical Domain

Q: What kind of mechanical questions are asked?

A: Questions may include robotics mechanisms, engineering fundamentals, and aptitude.

Q: Is robotics knowledge important?

A: Basic robotics understanding is useful.

Possible Student Queries: mechanical, robotics mechanism, engineering aptitude

VFX and GFX Domain

Q: What is asked in VFX GFX domain?

A: The domain focuses on creativity, visual thinking, and basic design understanding.

Q: Will software knowledge be asked?

A: Basic understanding of tools and creative workflows may help.

Possible Student Queries: vfx, gfx, creativity, design, editing tools

ID Card and Documents

Q: Is ID card compulsory?

A: Yes, college ID card is mandatory.

Q: Can I show photo of ID card?

A: In some situations, ID photos may be accepted.

Q: Do we need rough sheets or papers?

A: Generally no additional papers are required.

Possible Student Queries: id card, documents, rough sheet, photo id

Selection and Results

Q: When will results be declared?

A: Results are generally announced within 3 to 5 days.

Q: Is there a fixed cutoff?

A: Selection depends on overall performance and competition level.

Q: How many students are selected?

A: There is no fixed intake number.

Possible Student Queries: results, cutoff, selection, intake

Preparation Advice

Q: Is there a fixed syllabus?

A: No fixed syllabus is provided.

Q: How should I prepare?

A: Students should revise fundamentals, aptitude, and domain basics.

Q: Will sample questions be shared?

A: No sample questions are officially shared.

Possible Student Queries: syllabus, preparation, aptitude, basics
